PERSONAL SUMMARY

A committed and proactive Computer Science graduate with experience and specialization in software development, especially in web application. Recognized for strong research, communication, and problem-solving abilities, with comprehensive experience in programming, data structures, and application development. Proficient in collaborating within a team-oriented setting, demonstrating advanced interpersonal skills. Eager to bring my expertise to a Software Engineer role where I can apply my knowledge in a challenging environment, contribute to innovative projects, and continue my professional development.

PROFESSIONAL EXPERIENCE

eBottli, Adelaide, South Australia
Fullstack Website Developer   June 2023 – Present
- Participate in the planning, development, testing, and deployment phases of web applications.
- Ensuring alignment with our organization's technical requirements and business objectives.
- Foster a collaborative culture by working closely with fellow colleagues, and stakeholders.
- Regularly audit the website for usability, fix bugs promptly, and enhance efficiency.

eBottli, Adelaide, South Australia
Fullstack Developer Intern   Apr 2023 – June 2023
- Conduct high-quality workflow in a cooperative environment to meet project milestones.
- Develop web interface using AWS, Angular, and Node.js, improved user experience.
- Integrated new features into customers' websites using Firebase and REST API.
